INNOVATIVE IDEAS FOR AN IDEAL CLIMATE

The exciting selection of Whirlpool range of Air Conditioners represents a complete choice of appealing aesthetics to integrate your home's style.

Whirlpool products Series offer impeccable quality and performance besides additional design features to suit all individual needs.

Cool comfort is achieved through the intelligent control of the following operating functions:

-  dehumidification
-  cooling
-  heating
-  ventilation

Functional Excellence Sense the difference

Quiet cool

Whirlpool air conditioners ensure a peaceful, quiet home environment whilst efficiently providing cool comfort to the entire household. At lowest fan speed, the noise level of the 7000 BTU model, is lower than that of a latest generation domestic dishwasher.

Clean cool

All Whirlpool air conditioners are equipped with a set of 2 different filters. The first one is a pre-filter, specially treated with an anti-bacterial agent, that catches very small dust particles in the air. It can be easily removed and washed. The New Eco Flat range air conditioners have Electrostatic and Photo catalytic filters, the New Premium Series air conditioners are equipped with Actice Charcoil and Ion filters, while the Premium Inverter range also features the special Hepa Filter, able to capture tiny 0.3 micron-sized particles and pollen from the air. Hepa filters have a minimum effectiveness of 99.97%, and deodorize the air by eliminating unpleasant odours, ensuring the highest level of health protection in your home.

Mighty, uniform cool

Advanced rotary compressors guarantee refrigerant compression with minimal loss, thus significantly enhancing cooling efficiency. Whirlpool air conditioners' indoor units are equipped either with single flap or with double flaps, which allow uniform airflow for an optimally balanced air conditioning. Air flow direction can be precisely adjusted through the flaps using the remote control unit, so that cool or warm air reaches every corner of the room.

COOL COMFORT

Compact, efficient design

Whirlpool air conditioners are characterized by a stylish, yet discreet design. The white, compact-sized indoor units blend harmoniously into your home environment, providing the highest level of comfort without being noticed. Outdoor units have been designed for easy handling and to withstand external climate conditions, with plastic covers to protect tubes and prevent oxidation.

Easy cool

All single split air conditioners have a stylish, compact remote control unit with easy 6th sense and Jet buttons, and a large liquid crystal display. Function, temperature and airflow can be easily adjusted. For maximum comfort, programmable Timer and Sleep options are also available.

All Whirlpool air-conditioners feature an Auto-restart function, which will allow the unit to automatically re-start, after a power failure or an accidental disconnection, at the last setting before it was disconnected.

The front panel of the indoor unit on all split air conditioners can be easily removed and washed under running water.

Product specifications may vary from time of printing. Please refer to technical specification tables on page 29.

Function

When setting the 6th sense function, a temperature sensor in the indoor unit will automatically detect air temperature in the room and decide on the ideal combination of operating functions - cooling, heating, fan only and drying - to achieve maximum comfort.

Sleep mode function

This function automatically controls airflow speed and selects the ideal pattern of slightly increasing or decreasing temperature, according to whether it is in a cooling or heating function. Such patterns run over a period of 8 hours and have been designed to provide maximum comfort during sleep. A temperature that feels comfortable when we are awake may prove too cold, or warm, once we are fast asleep. The sleep mode intelligent function takes these natural adjustments into account.

Function

A fast cooling function is available on all split air conditioners. Easily activated by the jet button on the remote control unit, it sets the appliance to operate at high fan speed and cools the room automatically to 18°, regardless of the temperature previously set.

Pure and clean air

Besides making your home or business more comfortable Whirlpool air conditioners can also make the air you breath at home or work healthier. By offering the latest in filter technology, Whirlpool air conditioners create the ideal climate in your home for years of comfort and well being.

Anti - Dust Filter.

Washable and reusable filter to trap dust.

Standard on all models except:
Design Series Slim
Window Super Tropical Range
Super Tropical Range

HEPA Filter

Eliminates pollen, mill dust and pneumobacillus

HEPA means "high efficiency particulate air" and it is constructed of hundreds of small glass fibres that together form a sort of pleated paper through which air can pass; however, as the air passes through the filter small particles 0.3 microns in size become trapped and the air exits clean.

Standard on:
Premium Series Inverter range – R410a
Super Tropical Flat range – R22

COOL COMFORT

Negative Ion Filter

Filters and absorbs positive ion

Exposure to negative ions has been scientifically proven to make human beings feel better. In nature, sunlight, lightening, lakes, and ocean waves all generate negative ions. The negative ion filter works by emitting negative ions that cause positively charged particles such as dander, pollen, dust, and mold spores to clump together and fall to the floor where they can be easily removed from the environment. By preventing particles from staying airborne, negative ions help to keep the air clear and pure.

Standard on:

Premium Series Inverter range – R410a

Premium Series range – R410a

Design Series Inverter range – R410a

Super Tropical Flat range – R22

Active Charcoal Filters

Effectively absorbs smoke and dust

Active Charcoal filters work based on the principle of adsorption, which is different from absorption, and is the physical attraction and adherence of gas or liquid (vapour) molecules to the surface of a solid. The large porous surface area of an active carbon filter adsorbs harmful gas and odours from the air as the air is passed through the active carbon and becomes trapped in its pores. The filter can trap particles of pollen, dust, smog, pet dander, tobacco smoke, mildew, and mold spores as small as 0.3 microns. In general, the filter needs to be replaced every four months depending on exposure to contaminants and the use of the unit.

Standard on:

Premium Series range – R410a

Design Series Flat range – R410a

Electrostatic Filter

Makes the air fresher

The electrostatic filter is made of polypropylene and polyurethane, which, when air is forced through the filter creates an electrical charge. This charge attracts airborne particles as small as 0.3 microns and traps them in the filter. The filter never requires replacement as it can be cleaned gently with mild soap and water, and then reused.

Standard on:

Eco Flat Series range – R410a

Slim Series Range – R410a

Green Slim Series range – R407c

Design Series range – R407c

*Product specifications may vary from time of printing.
Please refer to technical specification tables on page 29.*

Photo Catalyst Filter

Reduces disease germ and odours

Photocatalyst filter system contains two key components: a UV lamp and a chemically treated filter. Exposure to this ultraviolet light causes the chemicals in the filter to become photoconductive. By means of this chemical process the photocatalyst filter cleans the air of microorganisms including fungus, bacteria spores and airborne viruses. This filter can also decompose odours with a deodorizing ability equal to 500 active-carbon deodorants. Its effect can last for about three to five months depending on the use of the unit.

Standard on:

Eco Flat Series range – R410a

Design Series Flat range – R410a

Slim Series Range – R410a

Green Slim Series range – R407c

Design Series range – R407c

Nano-metre Catalyst Filter

For a healthy and comfortable space

The catalyst filter filtrates, at the nano-metre level, viruses, bacteria and harmful gases and it purifies dust and peculiar odors making the air in the room fresh and the environment clean and healthy.

Standard on:

Design Series range – R407c

Anti-Bacterial filter

In addition to providing all the benefits of an electrostatic filter, the Anti Bacterial filter inhibits the growth of odor-causing bacteria, fungi, mold and mildew on the filter. *

The filter prevents the incubation of the microorganisms and is washable for reuse. Airborne particles are attracted to this electrostatic filter and remain attached to it until they are rinsed away.

Standard on:

Portables - AMD 091/092

**Tested on Staphylococcus aureus
and Aspergillums niger.*

AIR CONDITIONERS R407c

Green Range - Friendly to the environment

Design Series Slim

Whirlpool Design Series Slim, brings the same impeccable, reliable comfort to your home with an added stylish touch of crisp, elegant design. The horizontal grid pattern is completed by an extended but simplified display area, allowing the split unit to blend elegantly into your home environment.

Green Slim range single split

The slim range single split conditioner discreetly fits into any environment, especially where space restraints are better addressed by a less bulky design with a single flap for air flow direction, it is a smaller format in all aspects, including simplified operation for ease of use and peace of mind.

User Friendly Remote controls

It features a backlit liquid crystal display (not available on the Design Series), a real time clock and a key lock that prevents the buttons from being pushed accidentally.

Remote control of Green Slim Range

Remote control of Design Series Range

AIR CONDITIONERS R407c

With compact aesthetics the slim split range is appealing and user friendly. In fact with the new led display you can comfortably read the temperature in the room while sitting on the sofa and you can also check the mode of your air conditioner.

SLIM model with LED

1. Compressor Indicator (Red)

It lights up when compressor is running.

2. Signal receptor

Receives signal from the remote control.

3. Sleep indicator (Yellow)

It lights up when the unit is in sleep mode.

4. Timer Indicator (Orange)

It lights up during the set time.

5. LED display

Displays set temperature when setting temperature or it displays room temperature.

6. Run Indicator (Green)

It is on during operation.

Choosing the right air conditioner

It is important that the unit you choose is the correct size for the space that it will be required to cool. If the size is too big the air conditioner will continuously be shutting on and off as it will cool the room too quickly; conversely if the unit size is too small it will run continuously without properly cooling the room. This will use up a lot of energy meaning higher than necessary electric bills. In addition the air conditioner will not be able to dehumidify the air in the room effectively leaving it cold and clammy. For these reasons we suggest having the correct measurements on hand for choosing the right air conditioner. Simply follow the below instruction for ease of reference :

1. Measure the room. (Length x Width = area in square meter)
2. Match the room size to BTUs. See chart below

Kw/hr	BTU/H	Area to be cooled (Sq meter)
2,1	7000	23 a 28
2,6	9000	28 a 37
3,5	12000	37 a 51
5,3	18000	51 a 92
6,4	22000	92 a 120
7,0	24000	120 a 139
8,8	30000	139 a 185
12,0	41000	370
2,6+2,6	9000+9000	28 a 37 x 2
2,6+3,5	9000+12000	28 a 37 + 51 a 92

Adjust your BTU size for the following circumstances :

1. If the room is heavily shaded, reduce capacity by 10%
2. If the room is very sunny, increase capacity by 10 %
3. If more than two people regularly occupy the room, add 600 BTUs for each additional person.
4. If the unit is used in a kitchen, increase capacity by 4000 BTUs.

We always recommend that you consult a Whirlpool professional installer before you purchase the product.

AIR CONDITIONERS - R410a

Whirlpool range single split

The conditioners in these Whirlpool ranges are equipped with the R410a refrigerant gas. Aside from not damaging ozone layer and free of any substances harmful to the environment, R410a makes the operation of the air conditioners in this range significantly more energy efficient. Appliances using R410a gas achieve a higher classification in terms of energy efficiency. All single and dual splits of the Premium and Eco Flat series products have energy class "A" in cooling. In other words, it takes less energy to achieve the same level of comfort, which results in an even higher standard in environmental awareness. The R410a gas also gives this range more power and speed to give you the ideal climate in your home.

New Premium Series Range

New Stylish design and Environmental Friendly

The new Premium Series have a stylish design with its bright white colour, elegant slightly curved front panel enhanced by a small metal stripe. It has a long black user interface with nice blue digit display.

The efficiency of these products is reflected by the A energy class across the range in cooling, while in heating mode most of the codes have A or B energy class.

This range also features dual splits and environmental friendly inverter models and a user friendly and compact remote control (see details below).

Function

The Round U advanced function, available on the Premium Series and on the Design Series range air conditioners, has the further advantage of having an advanced sensor lodged in the user friendly remote control unit, thus keeping the central unit updated with more accurate info about the cooling/heating requirements in the actual vicinity of the user. The remote control sends a signal to the indoor unit every 10 minutes, indicating the temperature around the spot where the user stays with the remote control. The air conditioner will automatically adjust its function to reach the desired temperature in the quickest way possible.

User friendly Remote Control

The Premium range air conditioners have a user-friendly designed, compact remote control. It features a backlight liquid crystal display, a real time clock and the advanced Round U function.

AIR CONDITIONERS - R410a

New Eco Flat Series Range

New simple flat design and Efficient

The new Eco Flat Series have a simple pleasant design with bright white colour, flat front panel and elegant silver display with green digits.

The efficiency of these products is reflected by the A energy class across the range in cooling. It features both single and dual split models.

The Design Series Product Range Environmentally friendly and efficient

The Design Series, provides an even greater variety of design options to find that perfect match with your home environment. The Design Series range Flat models includes a range of Dual Split and versions equipped with the highly advanced inverter technology, Single 9K and 12K BTU and also the new Triple 9K+9K+12k BTU version.

Inverter technology precisely controls compressor rotation speed; when the room warms up, the compressor speed increases proportionately; when the room cools down, the compressor slows down. This means that the compressor wattage and the amount of refrigerant used at a certain time, vary depending on the actual ambient temperature. This reduces energy consumption and hence costs, whilst maintaining your home's temperature at the highest possible comfort level.

The Slim Series Product Range

Available from 7k to 24k BTU capacity including heat pump models,

OUTDOOR UNIT

INVERTER TECHNOLOGY - R410a

Inverter technology is providing quick and comfortable cooling whilst saving energy

Turbo cool

The Inverter features a Turbo function, similar to the jet function of other models, but with an increased fan speed and thus quicker cooling or heating of the room. The set temperature in cooling mode is 18°, while in the heating mode it is 32°C. To exit TURBO mode press the TURBO button again.

Faster

Selected temperature is reached faster than with conventional air conditioners. The high frequency operation at start-up increases cooling/heating capacity by 30% to 50%, hence reaching set temperature twice as fast.

Ever more energy efficient

Inverter technology controls the electrical frequency of the compressor according to the cooling and heating load of a room. When less power is needed, frequency is lowered, therefore reducing electricity consumption. The savings in energy consumption can be as high as 30% when compared to conventional technology.

More precise, more comfortable

The Inverter's unique frequency conversion technology ensures that deviations from the set temperature are minimized without having to frequently switch the unit on and off. The room temperature fluctuation is kept within a minimal +/- 0,5°C range, which adds to the high standard of comfort.

Eco Flat and Design Series Range

New Eco Flat Series Tropical and Super Tropical Range

The new Eco Flat Series have a simple pleasant design with bright white colour, flat front panel and elegant silver display with green digits.

They are designed for easy installation in your home reaching the best results of cool comfort. Whirlpool range of products feature both normal and super tropical models which can withstand temperature up to 52 °C.

Design Series Tropical Slim Range

Even in extreme climate conditions, Whirlpool's range of air conditioners offers the widest possible choice of exciting design to bring stylish comfort to your home. The Tropical Design Series, combines high efficiency with simplicity of design to better suit individual needs.

User-Friendly Remote Control

The Eco Flat range air conditioners have a user-friendly designed, compact remote control, which features a backlight liquid crystal display.

WINDOW range

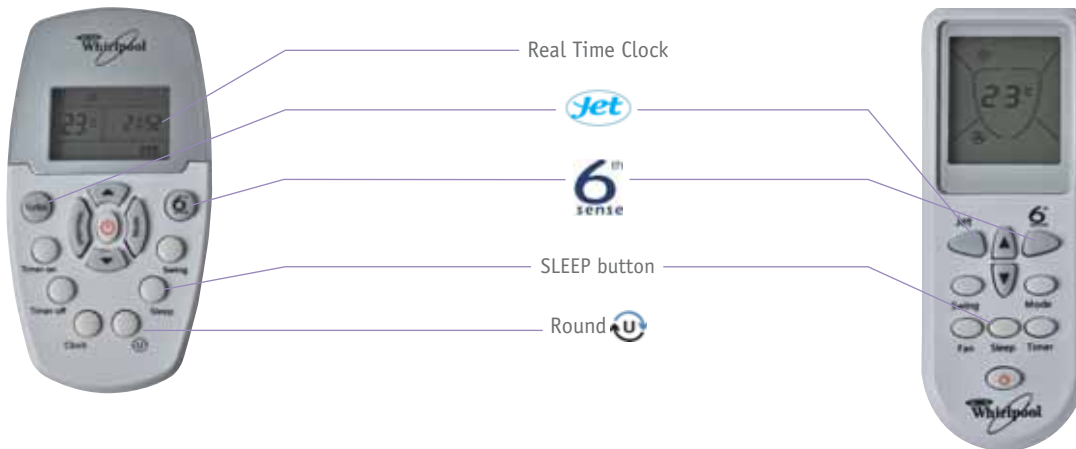

Whirlpool window air conditioners are self contained units designed to fit into a standard window that slides up or down. Easy to install as all you need is an electric plug and a window to slide the unit into.

Whirlpool range features a number of electronic models equipped of a 6th sense remote control for easy operation as well as a tropicalized range of mechanical models to withstand temperature up to 52°C.

It is advisable to remove your window air conditioner during winter to save on heating costs.

REMOTE CONTROLS

THE REMOTE CONTROLS NEED TO BE PRESET AT FIRST USE. PRESETTING MUST BE DONE WITHIN 12 SECONDS, OR IT WILL AUTOMATICALLY BE SET TO THE HEAT PUMP FUNCTIONS

Remote control type and button functions depend on the air conditioner model purchased

Remote controls work up to a max distance of 6m from indoor unit

MODE: cooling, dry, fan only, heating

FAN: auto, high, medium, low

Dry mode - only set as low

Fan only - hi-med-low

SWING: automatic vertical airflow direction control sets as

Cooling, dry - horizontal

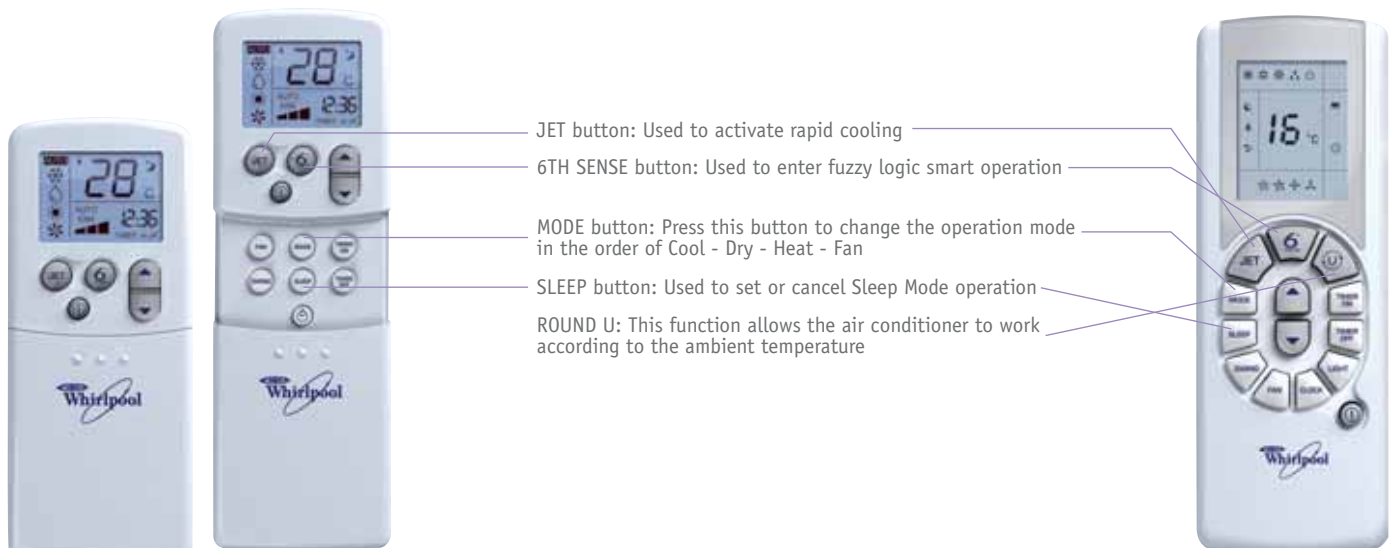

Heating, fan only - downward

TIP: in cooling, drying modes avoid keeping swing control downwards for too long to prevent condensed water from dripping

TIMER: programmable switch on/off timer

not set at day time but as time frame

Before using the air conditioner, be sure to check and preset your remote control. Please refer to the Instruction for Use for further details.

Portable Units

With Whirlpool portable units, cool comfort can now be obtained in any room in your home, at any moment. The small, highly flexible units are optimized single ducting units developed from dual ducting technology for optimal cooling efficiency. The absence of a water tank – a pump drains the condensed water instead – makes operation of the unit easy and carefree. Whirlpool portable cooling units are also equipped with a remote control and the latest 6th sense technology, for the perfect regulation of the temperature in your home. Your portable units are equipped with an installation kit. The kit for installation to the window has been designed to fit most standard vertical and horizontal window applications.

New Portables (AMD 091, AMD 092)

The new Portable products have a pleasant design with bright white or beautiful silver front colour, light grey side, 2 big wheels for easy transportation, and easy to use controls. These 2 products feature a 2kW heating element as an additional heating source to your traditional heating system. They also have the special anti-bacterial filter which eliminates fungi and bacteria.

Cooling only

■ Including heating elements

How to Install Your Portable Room Air Conditioner

Choose a Location:

- Place the portable air conditioner on strong, level flooring near a venting source, such as a window or door
- Allow 49,5 cm to 179 cm of space between the unit and a door or window
- Keep a required 49,5 cm distance between the back air inlet and the wall or other obstacles

NOTE: Do not block air outlet
Do not use plug adapters or extension cords with this air conditioner

Flexible Exhaust Hose

Twist exhaust hose clockwise into the exhaust outlet on the back of the air conditioner

Window Exhaust Adapter

Attach window exhaust adapter to flexible exhaust hose; turn clockwise until securely locked into place

Adjustable Window Slider

Place slider in window and extend to fit the width; close window and insert window exhaust adapter into slider kit (with flexible exhaust hose connected)

CEILING CASSETTE

R407c

Ceiling Cassette

Whirlpool ceiling cassette conditioners, with their high cooling and heating capacity, are ideal for larger spaces such as commercial premises, restaurants, bars, caffè's or offices. Their ultra slim design fits anywhere and allows for easy installation. Advanced features such as the 6th sense function, a 24 hour ON/OFF timer, easy to use LCD remote control, and 3 speed control make for exceptional performance and comfort. Both models run on the environmental friendly R407C gas.

LRA (Lock Rotor Amps)	24	23	24	23	29	29
Power Cord Length (m) - Cabinet to Wall	1,5	1,5	1,8	1,5	1,5	1,5
DIMENSIONS						
Indoor Unit (WidthxHeightxDepth) (mm)	460x840x360	460x840x360	455x856x370	450x845x500	450x845x500	450x845x500
Weight indoor/outdoor (Kg)	35,9	38,5	36	44	41	41

TECHNICAL SPECIFICATIONS R407c - CASSETTE

R407c	CASSETTE	
	Model number	AMB 888/G
12 NC	8528 888 10000	8528 889 10000
EAN Code	800 3437 75390 9	800 3437 75391 6
MAIN FEATURES		
Air conditioner type	Cassette	Cassette
	Heat & Cool	Heat & Cool
Colour (indoor/outdoor)	White / Gray	White / Gray
PERFORMANCES		
Cooling capacity - BTU/h	25327	43600
Cooling capacity - Watt	7423	12800
Heating capacity - BTU/h	27800	46600
Heating capacity - Watt	8160	13650
EER cooling (Btu/watt hr)	9,72	9,59
COP for Heating (w/w)	3,12	2,78
Energy Class (cooling/heating)	C/D	C/E
Noise level - Indoor Unit (dBA) - max	46	52
Noise level - Indoor Unit (dBA) - min	40	45
Noise level - Outdoor Unit (dBA)	60	63
Dehumidification - Liters/h	2,8	5
Air Flow - max (CFM)	650	950
Refrigerant type	R407c	R407c
Refrigerant charge volume (kg)	2,38	3,98
Climate Class	T1	T1
FEATURES		
6th Sense	Yes	Yes
TURBO cool (Jet)	Jet	Jet
Timer on-off 24h	Yes	Yes
Temperature display on remote control	Yes	Yes
Real Time Clock on remote control	No	No
Sleep Mode	Yes	Yes
Automatic air swing	Yes	Yes
Fan Only	Yes	Yes
No. of cooling/heating speeds	4 (3 Speeds + Auto)	4 (3 Speeds + Auto)
Twin Flaps	No	No
Wide angle air swing	120	120
Auto restart after blackout	Yes (by default)	Yes (by default)
Electric heating mode	Optional	Optional
Auto Defrost for outdoor unit	Yes	Yes
Easy to install (special feature)	Yes	Yes
Removable, washable Panel	Yes	Yes
compressor type	Rotary	Scroll
CONTROLS		
Remote Control	Yes	Yes
AIR PURIFICATION		
Anti bacterial dust filter - washable	Yes	Yes
HEPA filter	No	No
ION filter	No	No
ELECTRICAL RATINGS		
Volts/Frequency (Hz)	220-240V/50Hz	380V/50Hz/3P
Fuse Size (Amps)	35	30
Ampere (A) - cooling	12,2	9
Power input (W) - cooling	2500	4198
Ampere (A) - heating	12,4	10
Power input (W) - heating	2631	5032
Ampere (Heater) OPTIONAL	9,6	4,6
Power input (W) - (Heater) OPTIONAL	2100	3000
LRA (Lock Rotor Amps)	58	55
Power Cord Length (m) - Cabinet to Wall	N.A.	N.A.
DIMENSIONS		
Indoor Unit (WidthxHeightxDepth) (mm)	840x220x840	840x320x840
Indoor Unit Panel (WidthxHeightxDepth) (mm)	950x40x950	950x40x950
Outdoor Unit (WidthxHeightxDepth) (mm)	832x702x380	890x793x414
Weight indoor/panel/outdoor (Kg)	35/9/60	46/9/114
